

AMF MECH LTD ENVIRONMENTAL POLICY:

We acknowledge that our activities may have an impact on our environment and accept our responsibility to foster environmental awareness, sound management and sustainability through the implementation of best practice where possible.

AMF Mech Ltd recognise the protection of the environment and the prevention of pollution as business goals in their contribution to business performance, through improved quality, efficiency and sustainable development.

Consideration of environmental concerns is now a priority in the planning, design and construction phases of engineering projects.

AMF environmental policy is to advise clients and to manage engineering activities with a view to prevent, reduce or mitigate harmful effects on the environment.

It is the intention of AMF to:

- Comply with relevant environmental legislation, best environmental practice and approved codes of conduct as a minimum level of performance.
- Set out environmental objectives and targets to minimise the environmental impact of all our activities.
- Continually improve our environmental performance through the review of our practices and our objectives and targets.
- Provide the necessary resources, including finance and time, to implement this policy and to continually improve our performance.
- Raise awareness, educate and train employees in environmental issues through courses, in-house seminars and email updates.
- Inform sub-contractors of our environmental policy to encourage good environmental practice.
- Continually improve our planning and design work to minimise the environmental impact of all our projects and activities and mitigate against adverse environmental impacts.

The Environmental Safety Management System is designed to comply with the requirements of ISO14001:2015 (The Standard), except where exclusions are allowed and to continually improve the EMS system itself and the service to Clients. The environment is a fragile balance of nature in which we live and work. We all have a responsibility towards that environment to ensure our operations are carried out with respect and sensitivity towards our natural resources for the benefit of this and future generations.

AMF will review this policy annually along with the company objectives and targets, with the approval of the Managing Director
